

# 9.1 Morris County

This section presents the jurisdictional annex for the Morris County.

# 9.1.1 Hazard Mitigation Plan Point of Contact

The following individuals have been identified as the hazard mitigation plan's primary and alternate points of contact.

| Primary Point of Contact                      | Alternate Point of Contact                    |
|---|---|
| Keith Heimberg                                | Jeffrey Paul                                  |
| Office of Emergency Management                | Office of Emergency Management                |
| 500 West Hanover Avenue, Parsippany, NJ 07054 | 500 West Hanover Avenue, Parsippany, NJ 07054 |
| 973-829-8600                                  | 973-829-8600                                  |

# 9.1.2 County Profile

Please refer to Section 4, Volume I of this Plan for details on Morris County's population, location, climate, history, growth, and development.

## 9.1.3 Natural Hazard Event History Specific to Morris County

Morris County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5.0 of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the County and its municipalities.

# 9.1.4 Natural Hazard Risk/Vulnerability Risk Ranking

The table below summarizes the hazard risk/vulnerability rankings of potential hazards for Morris County.

Table 9.1-1. Hazard Risk/Vulnerability Risk Ranking

| Hazard type            | Estimate of Potential Dol<br>Structures Vulnerable to   |   | Probability<br>of<br>Occurrence | Risk Ranking<br>Score<br>(Probability x<br>Impact) | Hazard<br>Ranking <sup>b</sup> |
|------------------------|---|---|---------------------------------|--|--------------------------------|
| Drought                | Damage estimate not a                                   | available                                     | Frequent                        | 27   | Medium                         |
| Dam Failure            | Damage estimate not a                                   | available                                     | Occasional                      | 24   | Medium                         |
| Earthquake             | 500-year MRP:<br>2,500-year MRP:                        | \$130,362,580<br>\$2,352,428,663              | Occasional                      | 32   | High                           |
| Extreme<br>Temperature | Damage estimate not available                           |   | Frequent                        | 18   | Medium                         |
| Flood                  | 1% Annual Chance:                                       | \$571,622,902                                 | Frequent                        | 18   | Medium                         |
| Geological Hazards     | Exposed to Class A and Class B:                         | \$694,938,060                                 | Frequent                        | 18   | Medium                         |
| Severe Storm           | 100-Year MRP:<br>500-year MRP:<br>Annualized:           | \$102,243,221<br>\$583,667,434<br>\$6,447,600 | Frequent                        | 48   | High                           |
| Winter Storm           | 1% GBS:<br>5% GBS:                                      | \$1,548,769,434<br>\$7,743,847,171            | Frequent                        | 54   | High                           |
| Wildfire               | Estimated Value Exposed to Extreme, Very High and High: | \$840,065,289                                 | Frequent                        | 18   | Medium                         |
| Disease Outbreak       | Damage estimate not available                           |   | Frequent                        | 36   | High                           |
| Hazardous Materials    | Damage estimate not available                           |   | Frequent                        | 36   | High                           |

| Hazard type | Estimate of Potential Dollar Losses to<br>Structures Vulnerable to the Hazard <sup>a, c</sup> | Probability<br>of<br>Occurrence | Risk Ranking<br>Score<br>(Probability x<br>Impact) | Hazard<br>Ranking <sup>b</sup> |
|-------------|---|---------------------------------|--|--------------------------------|
| Infestation | Damage estimate not available   | Frequent                        | 18   | Medium                         |

### Notes:

- a. Building damage ratio estimates based on FEMA 386-2 (August 2001)
- The valuation of general building stock and loss estimates was based on custom inventory for the County.
   High = Total hazard priority risk ranking score of 31 and above
   Medium = Total hazard priority risk ranking of 20-30+
   Low = Total hazard risk ranking below 20
- c. Loss estimates for the severe storm and severe winter storm hazards are structural values only and do not include the value of contents.
- d. Loss estimates for the flood and earthquake hazards represent both structure and contents.
- e. The HAZUS-MH earthquake model results are reported by Census Tract.

## 9.1.5 Capability Assessment

This section identifies the following capabilities of the local jurisdiction:

- Planning and regulatory capability
- Administrative and technical capability
- Fiscal capability
- Community classification
- National Flood Insurance Program
- Integration of Mitigation Planning into Existing and Future Planning Mechanisms

## **Planning and Regulatory Capability**

The table below summarizes the regulatory tools that are available to Morris County.

Table 9.1-2. Planning and Regulatory Tools

| Tool / Program<br>(code, ordinance, plan)         | Enforcement<br>Authority | Code Citation and Comments<br>(code chapter, date of adoption, name of plan, explanation of<br>authority, etc.) |
|---|--------------------------|---|
| Building Code                                     | State of NJ              | NJAC 5:23-3, 14   |
| Zoning Ordinance                                  | Municipal                | NJSA 40:55D-1 et seq.   |
| Subdivision Ordinance                             | Municipal                | NJSA 40:55D-1 et seq.   |
| NFIP Flood Damage Prevention<br>Ordinance         | Municipal                | NJSA 40:55D-1 et seq.   |
| Cumulative Substantial Damages                    | N/A                      |   |
| Freeboard   | N/A                      |   |
| Growth Management                                 | N/A (Advisory)           |   |
| Floodplain Management / Basin<br>Plan             | NJDEP                    | Executive Order 11988   |
| Stormwater Management<br>Plan/Ordinance           | NJDEP                    | NJDEP Rule N.J.A.C. 7:8   |
| Comprehensive Plan / Master<br>Plan/ General Plan | County/Municipal         | NJSA 40:27-1 et seq., NJSA 40:55D-1 et seq.   |
| Capital Improvements Plan                         | County/Municipal         | NJSA 40:27-1 et seq., NJSA 40:55D-1 et seq.   |
| Site Plan Review Requirements                     | Municipal                | NJSA 40:55D-1 et seq.   |
| Open Space Plan                                   | N/A (advisory)           | Morris County Open Space Element, October 6, 1988   |
| Stream Corridor Management<br>Plan                | N/A (advisory)           |   |
| Watershed Management or<br>Protection Plan        | NJDEP                    | Whippany River and Rockaway River   |
| Economic Development Plan                         | N/A                      |   |
| Comprehensive Emergency<br>Management Plan        | N/A                      |   |

**Table 9.1-2. Planning and Regulatory Tools** 

| Tool / Program<br>(code, ordinance, plan)                                    | Enforcement<br>Authority | Code Citation and Comments<br>(code chapter, date of adoption, name of plan, explanation of<br>authority, etc.) |
|--|--------------------------|---|
| Emergency Response Plan  | Morris County OEM        | Emergency Operations Plan, Revised 2014   |
| Post Disaster Recovery Plan  | N/A                      |   |
| Post Disaster Recovery<br>Ordinance  | N/A                      |   |
| Real Estate Disclosure<br>Requirement  | N/A                      |   |
| Other [Special Purpose<br>Ordinances (i.e., critical or<br>sensitive areas)] | N/A                      |   |

# **Administrative and Technical Capability**

The table below summarizes potential staff and personnel resources available to Morris County.

**Table 9.1-3. Administrative and Technical Capabilities** 

| Staff/ Personnel Resources  | Available<br>(Y or N) | Department/ Agency/Position   |
|---|-----------------------|---|
| Planner(s) or Engineer(s) with knowledge of land development and land management practices                  | Y                     | Department of Planning and Public Works, Park Commission                          |
| Engineer(s) or Professional(s) trained in construction practices related to buildings and/or infrastructure | Y                     | Department of Planning and Public Works, Park Commission                          |
| Planners or engineers with an understanding of natural hazards  | Y                     | Department of Planning and Public Works   |
| NFIP Floodplain Administrator   | N                     | Municipal Function  |
| Surveyor(s)   | Y                     | Department of Planning and Public Works   |
| Personnel skilled or trained in "GIS" applications  | Y                     | Office of Information Technology  |
| Scientist familiar with natural hazards in the county.  | N                     |   |
| Emergency Manager   | Y                     | Office of Emergency Management  |
| Grant Writer(s)   | Y                     | Each Department/Agency has staff that is capable of grant writing                 |
| Staff with expertise or training in benefit/cost analysis   | Y                     | Each County Department/Agency head is capable of conducting benefit/cost analyses |
| Professionals trained in conducting damage assessments  | N                     |   |

# **Fiscal Capability**

The table below summarizes financial resources available to Morris County.

**Table 9.1-4. Fiscal Capabilities** 

| Financial Resources   | Accessible or Eligible to Use<br>(Yes/No/Don't Know) |
|---|--|
| Community Development Block Grants (CDBG)                         | Yes  |
| Capital Improvements Project Funding                              | Yes  |
| Authority to Levy Taxes for specific purposes                     | Yes  |
| User fees for water, sewer, gas or electric service               | No   |
| Impact Fees for homebuyers or developers of new development/homes | No   |
| Incur debt through general obligation bonds                       | Yes  |
| Incur debt through special tax bonds                              | Yes  |

| Financial Resources                                | Accessible or Eligible to Use<br>(Yes/No/Don't Know) |
|--|--|
| Incur debt through private activity bonds          | No   |
| Withhold public expenditures in hazard-prone areas | No   |
| Mitigation grant programs                          | Yes  |
| Other  | Yes  |

### **Community Classifications**

The table below summarizes classifications for community program available to Morris County.

**Table 9.1-5. Community Classifications** 

| Program  | Classification | Date Classified |
|--|----------------|-----------------|
| Community Rating System (CRS)                        | N/A            |                 |
| Building Code Effectiveness Grading Schedule (BCEGS) | N/A            |                 |
| Public Protection                                    | N/A            |                 |
| Storm Ready  | NP             |                 |
| Firewise   | NP             |                 |

N/A = Not applicable. NP = Not participating.

The classifications listed above relate to the community's ability to provide effective services to lessen its vulnerability to the hazards identified. These classifications can be viewed as a gauge of the community's capabilities in all phases of emergency management (preparedness, response, recovery and mitigation) and are used as an underwriting parameter for determining the costs of various forms of insurance. The CRS class applies to flood insurance while the BCEGS and Public Protection classifications apply to standard property insurance. CRS classifications range on a scale of 1 to 10 with class 1 being the best possible classification, and class 10 representing no classification benefit. Firewise classifications include a higher classification when the subject property is located beyond 1000 feet of a creditable fire hydrant and is within 5 road miles of a recognized Fire Station.

Criteria for classification credits are outlined in the following documents:

- The Community Rating System Coordinators Manual
- The Building Code Effectiveness Grading Schedule
- The ISO Mitigation online ISO's Public Protection website at http://www.isomitigation.com/ppc/0000/ppc0001.html
- The National Weather Service Storm Ready website at http://www.weather.gov/stormready/howto.htm
- The National Firewise Communities website at http://firewise.org/

### Integration of Hazard Mitigation into Existing and Future Planning Mechanisms

It is the intention of this County to incorporate hazard mitigation planning and natural hazard risk reduction as an integral component of the County's administrative, regulatory, and operational framework. A summary of how the County currently integrates hazard mitigation into daily operations is presented below. In addition, the County identified specific integration activities that will be incorporated into procedures and are included in their updated mitigation strategy.

### Planning

**Land Use Planning:** The Department of Planning and Public Works supports local planning and seeks to integrate consideration in natural hazard risk and support mitigation project identification and implementation through its planning programs, resources, and Office of Emergency Management.

**Integration of Improved Hazard Information into Existing Emergency Management Plans:** The County continues to develop, enhance and implement existing emergency response plans to utilize new and developing technology/information as it becomes available. As per this plan, the County critical facility inventory was updated and new facilities were added via geo-coding to have one spatial data set for future analysis. MC OEM, FMP and Planning will research BMP's on integrating hazard mitigation in municipal master plans and land use regulations.

**Morris County Flood Mitigation Program (MCFMP)**: The MCFMP creates site-specific Flood Acquisition Plans (FLAPs) for municipalities upon their request. FLAP contains a narrative, map and potential flood acquisition target list. Historic/current flooding trends are analyzed and flood-prone areas are designated. FLAP is developed in cooperation with municipality and presented in closed session to elected officials.

Additionally, the MCFMP obtains most current RL and SRL lists from NFIP on a regular basis; these lists typically are released twice a year (April and September).

MCFMP presents FLAPs to municipalities, including discussion of NFIP. MCOEM facilitated a presentation of the MC-FMP to municipal OEM officials. MC-FMP has presented at several conferences: ASFPM, NJAFM, ANJEC Environmental Congress, Passaic River Basin Workshop, NJ State Planning Summit, and New Jersey Land Rally to raise community awareness of flooding issues and NFIP

**Hazard Mitigation:** The County works with NJOEM and FEMA to incorporate any recommended revisions per review of the County's current HMP and all future plan updates which is a mitigation priority to develop a better plan for the County and participating municipalities. Future planning initiatives pursued by the Office of Emergency Management intend to incorporate hazard mitigation planning into operational plans. Additionally, critical facilities will continue to be a priority for mitigation projects. The County will continue to encourage and support municipalities to implement jurisdictional level mitigation projects and programs.

### Regulatory and Enforcement

The Morris County Office of Health Management maintains and keeps accurate, updated Right to Know (RTK) files, while critical infrastructure sites are shared between the MCOEM and the County Prosecutor's Office.

MC OEM, FMP and Planning will keep up to date on the federal, state and regional agency regulations and programs affecting floodplain management.

The County HMP is a vital resource for flood mitigation. As such, the HMP will continue to affect floodplain management, zoning, subdivision regulations and other local regulations where possible and appropriate.

The County continues to ensure full and effective enforcement of building codes, floodplain management, zoning, and other risk-reducing regulations.

### Operational and Administration

MCOEM continues to fortify relationships and strategic partnerships within the county, with municipalities, and with private entities to further technical aspects of mitigation and preparedness. Examples include ongoing partnerships with County GIS, Planning and Public Works, private transportation companies, and local colleges and universities.

The MC Prosecutor's Office tracks Critical Infrastructure Sites based on all types of Integrated Data. Information can be shared upon request.

Morris County continues to consolidate and incorporate relevant local data related to hazards into future planning initiatives for the County.

Morris County provides grants information, planning tools, training and technical assistance to the municipal emergency coordinators during their coordinators meeting as needed.

The County has initiated a Flood Mitigation Program (see description of program above) for the buy-out of SRL residential properties from willing sellers. The County also coordinated the submission of four successful grant applications for multi-municipal de-snagging and shoal dredging projects.

### **Fiscal**

According to the Department of Planning and Public Works, future capital improvement projects will be evaluated to determine if they meet hazard mitigation goals and objectives. When developing upcoming transportation improvement programs, hazard mitigation actions will be funded as budget allows. Additionally, mitigation planning will continue to be incorporated into initiatives pursued by the Flood Mitigation Program.

### **Education and Outreach**

Morris County has regularly scheduled meetings with Emergency Managers from each community. During these meetings, speakers, such as Jersey Central Power & Light, are invited to further the situational awareness of initiatives throughout the County. NJOEM is present to answer questions for the municipality and the County uses this time to update the municipal OEMs on county and regional initiatives.

In addition to the outreach presence for the municipalities, OEM regularly schedules and sponsors trainings for EMS, healthcare, and fire personnel in coordination with volunteer organizations and other County agencies. Recent examples of such initiatives include Fit Test/Respiratory Management, Emergency Preparedness for Healthcare Organizations, NFPA 1584 – Incident Rehab, and American Red Cross' Shelter Operations course. OEM also provides awareness level emergency management training to new County employees. This training includes an overview of emergency management operations in the County, tips for personal preparedness, and an opportunity for new county employees to volunteer as on-call EOC personnel during times of disaster.

Through the New Jersey Forest Fire Service (NJFFS) and NJOEM, public education and outreach is provided to the residents of Morris County.

Outreach is conducted to municipalities to ensure planning consistency among documents in relation to hazard mitigation.

The Morris County Division of Mosquito Control provides educational programs and outreach to teach people about their role in the prevention of mosquito habitats. The Division provides informational handouts on mosquito biology, mosquito control, ticks, and pesticides. Additionally, Division staff gives presentations to civic groups, public officials, and private industries. The presentations include interactive displays and handouts.

The Morris County OEM social media initiative, MCUrgent, has gained an impressive following since 2012. Facebook serves as OEM's primary daily operations social platform with a following of over 10 thousand individuals. The OEM Facebook page provides tips for emergency preparedness, updates on incidents and events around the county, and general emergency management articles for general interest. The County's Twitter page serves as a notification system to alert followers via the Twitter platform or via SMS text messaging.

# 9.1.6 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and prioritization.

### **Past Mitigation Initiative Status**

According to the 2010 Plan's FEMA crosswalk, actions that were proposed to be undertaken by Morris County were included within the jurisdiction where the county agency action is to occur. For the 2015 plan update, all previous county actions and their status are listed in the table below.

**Table 9.1-6. Past Mitigation Initiative Status** 

| Description  | Status      | Review Comments  |
|--|-------------|--|
| 1.A.1: Develop <i>All Hazards</i> public education and outreach program for hazard mitigation and preparedness.  | Complete    | Hazard mitigation and preparedness education initiatives will continue to be provided to the public, municipal, and county employees. This action will not be included in the 2015 HMP Update.   |
| 1.A.2: Initiate a public awareness program on local TV channel for hazard safety.  | Complete    | Public awareness is now successfully conducted through a combination of multiple social media initiatives. This action will not be included in the 2015 HMP Update.  |
| 1.A.3: Conduct evacuation exercises with and for local Office of Emergency Management (OEM) personnel and private citizens.  | Discontinue | County does not currently have an evacuation plan. This action will not be included in the 2015 HMP Update.  |
| 1.A.4: Conduct yearly workshops related to FEMA hazard mitigation grant programs, including FMA, HMGP, PDM, SRL, and RFC, with a focus on those aspects available to private firms and property owners (coordinated with Action 1.B.1, below).   | Complete    | Conducted and completed. This action will not be included in the 2015 HMP Update.  |
| 1.A.5: Educate the public through NJOEM and<br>New Jersey Forest Fire Service outreach<br>programs and hazard mitigation workshops.  | Continuous  | Via NJFFS Community outreach programs. See<br>Integration of Hazard Mitigation into Existing and<br>Future Planning Mechanisms   |
| 1.B.1: Conduct yearly workshops related to FEMA hazard mitigation grant programs, including FMA, HMGP, PDM, SRL, and RFC (coordinated with Action 1.A.4, above).   | Complete    | Incorporated into quarterly municipal coordinator workshops. This action will not be included in the 2015 HMP Update.  |
| 1.C.1: Reach out to municipal Floodplain     Administrators, departments of planning, public works, engineering, etc. regarding the importance of hazard mitigation planning and provision of municipal plans and data for planning purposes.  | Continuous  | Outreach is conducted to municipalities to ensure planning consistency among documents in relation to hazard mitigation. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms   |
| 2.A.1: Develop and maintain relationships with organizations that can provide technical information and/or assistance in the areas of hazard identification and risk assessment. e.g., incorporate information re: implementation of Risk MAP initiative as source of improved information re: flood risk in participating municipalities. | Continuous  | MCOEM continues to fortify relationships and strategic partnerships within the county, with municipalities, and with private entities to further technical aspects of mitigation and preparedness.  Examples include ongoing partnerships with County GIS, Planning and Public Works, private transportation companies, and local colleges and universities. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms |
| 2.A.2: Undertake site-specific studies to better characterize flood risks to areas with extensive flood loss histories.  | Continuous  | MC Flood Mitigation Program (MC-FMP) creates site-specific Flood Acquisition Plans (FLAPs) for municipalities upon their request. FLAP contains a narrative, map and potential flood acquisition target list. Historic/current flooding trends are analyzed and flood-prone areas are designated.  |

**Table 9.1-6. Past Mitigation Initiative Status** 

| Description  | Status                  | Review Comments  |
|--|-------------------------|--|
|  |                         | FLAP is developed in cooperation with municipality and presented in closed session to elected officials. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms                                   |
| 2.A.3: Coordinate with state efforts to undertake detailed vulnerability assessments and develop mitigation options for critical facilities in V and VE zones.   | Discontinue             | There are no V or VE zones in Morris County; therefore, this action will not be included in the 2015 HMP Update.   |
| 2.A.4: Use best possible flood data, including DFIRM and Map Mod data, if available, in next plan update. Track implementation of Risk MAP initiative to ensure Gloucester County and municipalities gain full advantage of opportunities under this program.                        | Discontinue             | Morris County, not Gloucester County – mistake in previous HMP; therefore, this action will not be included in the 2015 HMP Update.  |
| 2.A.5: Continuously update and verify status of repetitive loss and severe repetitive loss lists from the NFIP.  | Continuous              | MC-FMP obtains most current RL and SRL lists from NFIP on a regular basis; these lists typically are released twice a year (April & Sept). See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms |
| 2.A.6: Inventory critical facilities to identify those in geographic areas that may be prone to high ground motion during earthquakes (due to proximity to faults or to soil characteristics), and those with structures that may be at risk during an earthquake.                   | No progress             | Minimal impact to Morris County; however, earthquakes do pose a threat to the County and this action will be revised and included in the 2015 HMP Update.  |
| 2.A.7: Coordinate with state efforts to prioritize critical facilities and conduct more detailed earthquake risk assessments, taking into account the relative importance of the facility and the level of seismic hazard.   | No progress             | Minimal impact to Morris County; however, earthquakes do pose a threat to the County and this action will be revised and included in the 2015 HMP Update.  |
| 2.A.8: Work with NJGS to determine soil and<br>shake characteristics at specific sites that the<br>county has identified as priority critical<br>facilities with potential vulnerabilities to<br>earthquake forces, and then work with<br>engineers to develop appropriate projects. | No progress             | Minimal impact to Morris County; however, earthquakes do pose a threat to the County and this action will be revised and included in the 2015 HMP Update.  |
| 2.A.9: Coordinate with NJGS and other county, state, and federal agencies to better identify specific sites in the county that may be exposed to the effects of geo-hazards such as landslides, sinkholes and subsidence.  | No progress             | Minimal impact to Morris County; however, earthquakes do pose a threat to the County and this action will be revised and included in the 2015 HMP Update.  |
| 2.A.10: Using a prioritized list of state, county, and local facilities, coordinate with state effort to survey wind vulnerabilities, based on criteria such as age of the facility, value of operations, proximity to the coast, etc.   | In Progress             | Waiting on state; this action will be included in the 2015 HMP Update.   |
| 2.A.11: Conduct wind risk assessments on a limited number of high-priority facilities that appear to be vulnerable to high winds.  Assessments will use standard FEMA guidelines, procedures and software, including the wind hazard database.                                       | In progress             | Currently in progress; this action will be included in the 2015 HMP Update.  |
| 2.A.12: Maintain effective coordination and information sharing related to hazardous material sites with NJOEM and the Right to Know (RTK) Network.  | On-Going/<br>Continuous | MCOHM continues to keep accurate updated RTK Files, while Critical Infrastructure Sites are shared between MCOEM, the MC Prosecutor's Office, and this Office (upon request). See <i>Integration of</i>                      |

**Table 9.1-6. Past Mitigation Initiative Status** 

| Description  | Status                   | Review Comments  |
|--|--------------------------|--|
|  |                          | Hazard Mitigation into Existing and Future Planning Mechanisms   |
| 2.A.13: Complete data collection for<br>Geographic Information System (GIS) analysis<br>and mapping of potential areas of impact<br>related to hazardous material sites.   | In Progress              | MCOHM does not current utilize GIS when it comes to Hazardous Materials Sites/ Locations in Morris County. This action will be included in the 2015 HMP Update.  |
| 2.A.14: Integrate data about hazardous materials with most current available information about other risk factors, e.g. population, climate, other site-specific characteristics.  | On-Going /<br>Continuous | The MC Prosecutor's Office tracks Critical Infrastructure Sites based on all types of Integrated Data. Information can be shared upon request. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms |
| 2.A.15: Complete a detailed analysis of past losses related to winter storms to determine if additional study is indicated.  | Complete                 | Provided earlier; therefore, this action will not be included in the 2015 HMP Update.  |
| 2.A.16: Undertake a survey of critical facilities to identify and prioritize those that may have structural characteristics that make them vulnerable to excessive snow and ice loads.   | No Progress              | No progress has been made on this action; therefore, it will be carried over into the 2015 HMP Update.   |
| 2.A.17: Complete a detailed analysis of past losses related to nor easters and other coastal storms to determine if additional study is indicated. Work with state and federal agencies to develop a detailed characterization of erosion history and risks in particular. | Discontinue              | Initiative specific to a coastal county – not Morris; therefore, this action will not be included in the 2015 HMP Update.  |
| 2.A.18: Work with appropriate agencies to identify specific areas that are vulnerable to storm effects, then inventory assets and populations in these areas as the basis for a risk calculation.  | In progress              | This is a continuous process and will be carried over into the 2015 HMP Update.  |
| 2.A.19: Work with NJDEP to more fully understand the dam hazard rankings and methodology behind them, particular regarding high-hazard sites.  | complete                 | Department of Planning and Public Works maintains regular contact with NJDEP; therefore, this action will not be included in the 2015 HMP Update.  |
| 2.A.20: Undertake more detailed engineering studies of dams that may pose risks to the county, based on additional data collected from state or federal agencies.  | No progress              | Include in update  |
| 2.A.21: Conduct detailed risk assessments for dams that appear to have vulnerabilities, and where there is potential for significant damage or loss of life.   | In progress              | Include in update  |
| 2.A.22: Conduct detailed risk assessments for levees which appear to have vulnerabilities, and where there is potential for significant damage or loss of life.  | Discontinue              | There are currently no levees within Morris<br>County; therefore, this action will not be included<br>in the 2015 HMP Update.  |
| 2.A.23: Work with NJDEP and other agencies to compile better information about levees in the county, including inventories, engineering data and any other studies (in particular those that may discuss or catalog past levee failures).                                  | Discontinue              | There are currently no levees within Morris<br>County; therefore, this action will not be included<br>in the 2015 HMP Update.  |
| 2.A.24: Undertake more detailed engineering studies of levees that may pose risks to the county, based on additional data collected from local, state or federal agencies.   | Discontinue              | There are currently no levees within Morris<br>County; therefore, this action will not be included<br>in the 2015 HMP Update.  |
| 2.A.25: Consolidate and incorporate relevant local data related to hazards, extent, probability, exposure, risk, history, etc.   | Continuous               | Relevant and local data will continue to be incorporated in future planning initiatives. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms   |

**Table 9.1-6. Past Mitigation Initiative Status** 

|   | _          |   |
|---|------------|---|
| Description   | Status     | Review Comments   |
| 2.B.1: Participate in the Emergency Preparedness Conference and workshops.  | Continuous | MCOEM continues to participate in multiple emergency preparedness conferences, including emergency management and EMS conferences.  This action will be carried over into the 2015 HMP Update.  |
| 2.C.1: Develop a database inventory of critical facilities countywide (county-, local-, and privately-owned), including fire and police stations, medical facilities, major public buildings important for emergency response and recovery, and critical lifeline transportation and utility nodes such as bridges, water treatment plants, wastewater treatment plants, high voltage electric substations, and hazardous materials facilities. | Continuous | The County continues to develop and update a current list of critical facilities. This action will be carried over into the 2015 HMP Update.  |
| 2.C.2: Prioritize critical facilities and complete<br>Phase I site surveys to identify vulnerabilities  | Complete   | Phase I site surveys completed; therefore, this action will be removed from the 2015 HMP Update.  |
| 3.A.1: Continue working with the State, as well as local jurisdictions, to encourage local cooperation in making Repetitive Loss (RL) (and SRL) property mitigation a high priority, and to offer municipalities technical support in carrying out the requirements of FEMA mitigation programs as well as current information related to RL and SRL properties.  | Continuous | MC-FMP works with NJOEM and NJDEP Blue Acres and FEMA on flood mitigation acquisition projects, including providing matching grant funding. MC-FMP also provides technical support and expertise to municipalities participating in these acquisition projects; especially FEMA's SRL and HMGP grant programs. The most recent RL & SRL lists are discussed whenever MC-FMP meets with municipalities. This action will be carried over into the 2015 HMP Update.             |
| 3.A.2: Provide grants information, planning tools, training and technical assistance to increase the number of public and private sector hazard mitigation projects.  | Continuous | Information provided and updated at Coordinator Meetings as needed. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms   |
| 3.A.3: Conduct direct outreach and education to municipal OEMs and other potential participants in Plan maintenance and future Plan updates   | Continuous | Continue to provide outreach and education to municipal OEMs. This action will be carried over into the 2015 HMP Update.  |
| 3.A.4: Work with NJOEM and FEMA to incorporate "recommended revisions" per NJOEM and FEMA Region II review of this Plan into future Plan updates.   | Continuous | Incorporation of "recommended revision" for this and subsequent HMPs will be a mitigation priority to develop a better HMP. See <i>Integration of Hazard Mitigation into Existing and Future Planning Mechanisms</i>  |
| 3.B.1: Conduct community outreach, workshops and training to increase NFIP participation (coordinate with outreach actions listed under Objectives 1.A and 1.B).  | Continuous | MC-FMP presents FLAPs (See 2.A.2) to municipalities, including discussion of NFIP. MC-OEM facilitated a presentation of the MC-FMP to municipal OEM officials. MC-FMP has presented at several conferences: ASFPM, NJ-AFM, ANJEC Environmental Congress, Passaic River Basin Workshop, NJ State Planning Summit, and NJ Land Rally to raise community awareness of flooding issues and NFIP See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms |
| 3.B.2: Encourage municipalities to participate in the CRS program, including potentially setting up CRS site visits and/or workshops for interested jurisdictions.  | Continuous | MC will continue to encourage municipalities to participate in CRS. This action will be carried over into the 2015 HMP Update.  |
| 3.B.3: Encourage municipalities to include identification and prioritization of actions   | Continuous | See 2.A.2 and 3.B.1   |

**Table 9.1-6. Past Mitigation Initiative Status** 

| Table 9.1-0. Past Mitigation initiative S  |                             |  |
|--|-----------------------------|--|
| Description related to future participation in and compliance  | Status                      | Review Comments  |
| with the NFIP  |                             |  |
| 3.C.1: Encourage enforcement of floodplain management as it relates to new and existing construction by integrating hazard mitigation practices with zoning, subdivision ordinances, comprehensive planning, and other land use tools at the municipal level.  | Continuous                  | MC OEM, FMP and Planning will research BMP's on integrating hazard mitigation in municipal master plans and land use regulations. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms  |
| 3.C.2: Coordinate with state efforts to encourage the New Jersey League of Municipalities to become more involved in mitigation activities, and in particular to support the activities described in Action 3.C.1 and 3.D.1.   | Complete                    | Coordination completed; therefore, this action will not be included in the 2015 HMP Update.  |
| 3.D.1: Encourage enforcement of floodplain management as it relates to new and existing construction by integrating hazard mitigation practices with zoning, subdivision ordinances, comprehensive planning, other land use tools, and environmental and other regulatory mechanisms via state requirements, reviews, and regulations. Coordinate with the State Planning Commission to integrate the State Development and Redevelopment Plan and the State Hazard Mitigation Plan. | Continuous                  | MC OEM, FMP and Planning will keep up to date on the federal, state and regional agency regulations and programs affecting floodplain management. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms  |
| 3.E.1: Develop a simple GIS platform, or build upon an existing platform, to maintain and analyze critical facilities inventories and information about hazards.   | In Progress /<br>Continuous | County OIT/GIS has retained a Critical Infrastructure layer and the USACE National Inventory of Dams spatial data layers. Plans are to make these datasets will be viewable in a secure ArcGIS Online application for Emergency Operations Officials. Also, PDF map books of critical infrastructure and of dams will be developed via two ArcGIS data driven page map projects. MCOM and MCOIT/GIS will continue to work together to develop a database for critical facilities within the County. This action will be included in the 2015 HMP Update. |
| 3.F.1: Explore potential for possible regionalization or consolidation of hazard mitigation planning, administration, and/or implementation at the county level  | No<br>Progress/Discontinue  | Regionalization unrealistic – already incorporate municipal and county levels. This action will not be included in the 2015 HMP Update.  |
| 4.A.1: Coordinate with state efforts to develop and implement a detailed severe repetitive loss mitigation strategy that will qualify the county and municipalities for 90:10 cost share under the FEMA SRL program.   | Discontinue                 | SRL Program has been discontinued on the federal level. New mitigation initiative will be developed with updated funding mechanism and included in the 2015 HMP Update.  |
| 4.A.2: Continue working with local and regional jurisdictions to encourage and support their efforts to mitigate RL (and SRL) properties, either individually through the use of cluster solutions and/or basin projects, as appropriate, and offer technical support in carrying out the requirements of FEMA mitigation programs.  | Continuous                  | The County has initiated a Flood Mitigation Program for the buy-out of SRL residential properties from willing sellers. The County also coordinated the submission of four successful grant applications for multi-municipal de-snagging and shoal dredging projects. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms  |
| 4.A.3: Implement mitigation projects and programs intended to reduce risk to critical facilities.  | Continuous                  | Critical facilities will continue to be a priority for mitigation projects. See <i>Integration of Hazard Mitigation into Existing and Future Planning Mechanisms</i>   |

**Table 9.1-6. Past Mitigation Initiative Status** 

| Description  | Status       | Review Comments   |
|--|--------------|---|
| 4.A.4: Implement other mitigation projects and programs as appropriate at the municipal level.   | Continuous   | The County will continue to encourage and support municipalities to implement jurisdictional level mitigation projects and programs. See Integration of Hazard Mitigation into Existing and Future Planning Mechanisms  |
| 4.B.1: Integrate hazard mitigation Plan and priorities into floodplain management, zoning, subdivision regulation, and other local regulations as appropriate. | Continuous   | The county HMP is a vital resource for flood mitigation. As such, the HMP will continue to affect floodplain management, zoning, subdivision regulations and other local regulations where possible and appropriate. See <i>Integration of Hazard Mitigation into Existing and Future Planning Mechanisms</i> |
| 4.B.2: Ensure full and effective enforcement of building codes, floodplain management, zoning, and other risk-reducing regulations.                            | Continuous   | Enforcement will continue on a regular basis; see Integration of Hazard Mitigation into Existing and Future Planning Mechanisms   |
| 4.B.3: Integrate hazard mitigation priorities into Capital Improvement Plans, transportation planning, and other capital planning                              | In Progress  | The County is developing a Circulation Plan Element and will be integrating hazard mitigation considerations where appropriate. This action will be included in the 2015 HMP Update.  |
| County DPW 1: Berkshire Valley Road drainage upgrade and slope stabilization.  | Completed    | Drainage upgrade and slope stabilization completed; therefore, this action will not be included in the 2015 HMP Update.   |
| County DPW 2: Morris County Bridge No. 1400-685 replacement due to inadequate hydraulic opening to stop repetitive overtopping of bridge.                      | Completed    | Bridge replacement completed; therefore, this action will not be included in the 2015 HMP Update.   |
| County DPW 3: Morris County Courthouse storm water run-off control upgrade.  | Completed    | Upgrade 100% completed; therefore, this action will not be included in the 2015 HMP Update.   |
| County DPW 4: Morris County Sheriff's Legal Services Office storm water run-off control upgrade.   | Completed    | The building removed in 2014; therefore, this action will not be included in the 2015 HMP Update.   |
| County DPW 5: Schooley's Mountain Road (County Route 517) drainage study and upgrade of storm water run-off control to stop flooding.                          | Completed    | Slope stabilization project completed. This action will not be included in the 2015 HMP Update.   |
| County DPW 6: Jaqui Mill Pond Dam inspection/risk assessment.  | In Progress  | Working through and with NJDEP on reclassification of the dam structure. This action will be included in the 2015 HMP Update.   |
| County DPW 7: Black Brook tributary hydrology study and stream bank stabilization.   | Discontinued | No future work is planned at this time; therefore, this action will not be included in the 2015 HMP Update.   |
| County Parks 1: Dam EAP development for five Class II Dams: Leddell's Pond, Sunrise Lake, Saffin Pond, Lake George, and Canty's Lake.                          | Discontinued | EAPs have been developed for the Class II Dams (Leddell's Pond, Sunrise Lake, Saffin Pond, Lake George, and Canty's Lake) in Morris County. However, this action will be revised and included in the 2015 HMP mitigation initiatives.   |
| County Parks 2: Dam EAP development for<br>five Class III Dams: Oak Ridge, Black River,<br>Kay Pond, Windy Hill Farm, and Loantaka<br>Brook                    | Discontinued | NJ DEP does not require EAP's for Class III dams. This action will be revised and included in the 2015 HMP mitigation initiatives.  |

# **Proposed Hazard Mitigation Initiatives for the Plan Update**

The County participated in a mitigation action workshop in January 2015 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

Table 9.1-7 summarizes the comprehensive-range of specific mitigation initiatives the County would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.1-8 provides a summary of the prioritization of all proposed mitigation initiatives for the Plan update.

**Table 9.1-7. Proposed Hazard Mitigation Initiatives** 

| Initiative                         | Mitigation Initiative   | Applies to<br>New<br>and/or<br>Existing<br>Structures* | Hazard(s)<br>Mitigated | Goals and<br>Objectives<br>Met | Lead and<br>Support<br>Agencies | Estimated<br>Benefits | Estimated<br>Cost | Sources of<br>Funding | Timeline             | Priority | Mitigation<br>Category | CRS<br>Category |
|------------------------------------|---|--|------------------------|--------------------------------|---------------------------------|-----------------------|-------------------|-----------------------|----------------------|----------|------------------------|-----------------|
| Morris<br>County-<br>1<br>(former) | Collect geologic information on seismic sources and soil conditions to gain an understanding as to what areas in the County are exposed and vulnerable to earthquakes. Develop an inventory of critical facilities that may be vulnerable to earthquake damage.   | Existing   | Earthquake             | G-2                            | DP & PW                         | Medium                | Medium            | County<br>Budget      | Long<br>Term<br>DOF  | Low      | LPR                    | PR              |
| Morris<br>County-<br>2<br>(former) | Collect an inventory of locations where County-owned critical facilities are vulnerable to landslides and develop a database to track the County's vulnerability to landslides.   | Existing   | Geological<br>Hazards  | G-2                            | DP & PW                         | Medium                | Medium            | County<br>Budget      | Long<br>Term<br>DOF  | Low      | LPR                    | PR              |
| Morris<br>County-<br>3<br>(former) | Using a prioritized list of state, county, and local facilities, coordinate with state effort to survey wind vulnerabilities, based on criteria such as age of the facility, value of operations, etc.  | Existing   | Severe<br>Weather      | G-2                            | OEM,<br>DP&PW<br>State Offices  | Medium                | Medium            | County<br>Budget      | Short<br>Term<br>DOF | Medium   | LPR                    | PR              |
| Morris<br>County-<br>4<br>(former) | Conduct wind risk assessments on a limited number of high-priority facilities that appear to be vulnerable to high winds, including facilities that serve as county emergency shelters during disaster. Assessments will use standard FEMA guidelines, procedures and software, including the wind hazard database. | Existing   | Severe<br>Weather      | G-2                            | OEM,<br>DP&PW                   | Medium                | Medium            | County<br>Budget      | Short<br>Term<br>DOF | Medium   | LPR                    | PR              |
| Morris<br>County-<br>5<br>(former) | Utilize GIS analysis and<br>mapping to identify<br>potential areas of impact  | N/A  | Hazardous<br>Materials | G-2                            | OHM, OIT<br>(GIS Division)      | High                  | Medium            | County<br>Budget      | Short<br>Term<br>DOF | Medium   | LPR                    | PR              |

**Table 9.1-7. Proposed Hazard Mitigation Initiatives** 

| Initiative                          | Mitigation Initiative   | Applies to<br>New<br>and/or<br>Existing<br>Structures* | Hazard(s)<br>Mitigated                            | Goals and<br>Objectives<br>Met | Lead and<br>Support<br>Agencies | Estimated<br>Benefits | Estimated<br>Cost | Sources of<br>Funding                               | Timeline             | Priority | Mitigation<br>Category | CRS<br>Category |
|-------------------------------------|---|--|---|--------------------------------|---------------------------------|-----------------------|-------------------|---|----------------------|----------|------------------------|-----------------|
|                                     | related to hazardous material sites.  |  | J   |                                |                                 |                       |                   |   |                      |          |                        |                 |
| Morris<br>County-<br>6<br>(former)  | Undertake a survey of County-owned critical facilities to identify and prioritize those that may have structural characteristics that make them vulnerable to excessive snow and ice loads. | Existing   | Severe<br>Winter<br>Weather                       | G-2                            | DP&PW                           | Medium                | Low               | County<br>Budget                                    | Long<br>Term<br>DOF  | Low      | LPR                    | PR              |

### Potential FEMA HMA Funding Sources:

FMAFlood Mitigation Assistance Grant ProgramShort1 to 5 yearsHMGPHazard Mitigation Grant ProgramLong Term5 years or greaterPDMPre-Disaster Mitigation Grant ProgramOGOn-going programDOFDepending on funding

<sup>\*</sup>Does this mitigation initiative reduce the effects of hazards on new and/or existing buildings and/or infrastructure? Not applicable (N/A) is inserted if this does not apply.

Where actual project costs have been reasonably estimated:

< \$10.000

\$10,000 to \$100,000 Medium

High > \$100.000

Where actual project costs cannot reasonably be established at this time:

Possible to fund under existing budget. Project is part of, or can be part of an existing on-going program.

Medium Could budget for under existing work plan, but would require a

reapportionment of the budget or a budget amendment, or the cost of the

project would have to be spread over multiple years.

High Would require an increase in revenue via an alternative source (i.e., bonds,

grants, fee increases) to implement. Existing funding levels are not

adequate to cover the costs of the proposed project.

Benefits:

Where possible, an estimate of project benefits (per FEMA's benefit calculation methodology)

has been evaluated against the project costs, and is presented as:

< \$10,000 Low=

Medium \$10,000 to \$100,000

> \$100,000 High

Where numerical project benefits cannot reasonably be established at this time:

Long-term benefits of the project are difficult to quantify in the short term.

Medium Project will have a long-term impact on the reduction of risk exposure to

life and property, or project will provide an immediate reduction in the risk

exposure to property.

High Project will have an immediate impact on the reduction of risk exposure to

life and property.

#### <u>Mitigation Category:</u>

Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

- Structure and Infrastructure Project (SIP)- These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.
- Natural Systems Protection (NSP) These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.
- Education and Awareness Programs (EAP) These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities

#### CRS Category:

- Preventative Measures (PR) Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.
- Property Protection (PP) These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.
- Public Information (PI) Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.
- Natural Resource Protection (NR) Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.
- Structural Flood Control Projects (SP) Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.
- Emergency Services (ES) Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

Note: Refer to Section 6 which contains the guidance on conducting the prioritization of mitigation actions.

# 9.1.7 Future Needs To Better Understand Risk/Vulnerability

None at this time.

### 9.1.8 Hazard Area Extent and Location

Hazard area extent and location maps have been generated for the Morris County that illustrate the probable areas impacted within the municipality. These maps are based on the best available data at the time of the preparation of this plan, and are considered to be adequate for planning purposes. Maps have only been generated for those hazards that can be clearly identified using mapping techniques and technologies, and for which the Morris County has significant exposure. These maps are illustrated in the hazard profiles within Section 5.4, Volume I of this Plan.
